## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 14, 20, 22, 28 and 29, drawn to a method of translating device layout data into a format for use by a mask writing tool, classified in class 716, subclass 3.
  - II. Claims 15 – 19, 21, 23 and 24 - 27, drawn to a computer readable media having stored thereon a set of instructions for causing a mask writing tool to create a mask, classified in class 716, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as creating a temporary file; reading a file that defines a number of cells used to produce a device; selecting one or more of the cells; creating modified cells based on the interaction of the selected cells

with other cells as well as their placements on the mask in the temporary file; and saving the temporary file in the mask writing tool format.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chris C. Chu whose telephone number is (703) 305-6194. The examiner can normally be reached on M-F (10:30 - 7:00).
